EDUCATION

JIS University, Agarpara **2023 – 2027**
B.Tech - Computer Science and Engineering - ***CGPA - 9.4*** *Agarpara, Kolkata*

Arambagh High School **2023**
Higher Secondary- ***Percentage - 85%*** *Arambagh, Hooghly*

EXPERIENCE

Summer Intern at Jalpaiguri Govt. Engg. College **June 2026 - July 2026**
Role - Research Intern *Jalpaiguri, West Bengal*

- Worked with image segmentation models and found some research gap in that domain, making some optimization to fill the research gap.

PROJECTS

ResearchMind:AI Research Assistant | Python, LangChain, Groq, Tavily, Streamlit **September 2026**
* Built a multi-agent pipeline (search agent, reader agent, writer chain, critic chain) that turns any topic into a sourced, structured research report with an automated quality score.
* Integrated Tavily search and BeautifulSoup scraping as agent tools, with output caps, retry logic and recursion limits to handle Groq rate limits reliably.

AI Video Agent | Python, LangChain, Groq, Whisper, ChromaDB, Streamlit **October 2026**
* Built an AI agent that converts YouTube links and uploaded audio or video (English and Hinglish) into transcripts, summaries, action items, key decisions and open questions.
* Designed the pipeline with yt-dlp, FFmpeg, local Whisper and LangChain chains on Groq LLMs, using map-reduce summarization for long recordings, plus RAG chat over each transcript with Hugging Face embeddings and ChromaDB.
* Deployed an animated Streamlit app with a live progress tracker, tabbed results, report download and rate-limit handling, and published the code on GitHub.

NYC-Airbnb-Room-Type-Predictor | Random Forest, FastAPI, Pydantic **August 2026**
* Build a room type predictor for checking the chance of what type of rooms you can got by taking the inputs of location, pricing and stay, reviews and host, availability and give the predicted room type
* Uses html, css, javascript as frontend, FastAPI as backend, deployed it on render.

Publications

An AI Based Decision Support Ecosystem for Urban Air Quality Management **ISBN - 978-81-98570**

- **RAISR-2026**

TECHNICAL SKILLS

Languages: Python, Numpy, Pandas, Machine Learning, Deep Learning ,C++, Java, SQL
Technologies/Frameworks: HTML5, CSS3, React, Node, Javascript, Bootstrap, Tailwind
Developer Tools: VS Code, PyCharm,

CERTIFICATIONS

- TCS Codevita Season XIII - **Global rank - 6369**
- NPTEL - Programming in Java - **percentage - 78%**
- NPTEL - Cloud Computing - **percentage - 81%**
- JGEC Internship - Deep Learning

EXTRACURRICULAR

- Solved overall 57 DSA problems at Leetcode
- GSSoC 2026 contributor
